

# Tevatron BPM Upgrade

Stephen Wolbers

HW Review

May 14, 2004

# Overview and Introduction

- The TeV BPM upgrade project is moving rapidly toward final design, prototyping, test and installation phases.
- First modified EchoTek boards are expected in June.
- First production boards in August.
- Installation during the shutdown.
- Commissioning after beam returns (Nov 22).

## Goal Today

- The goal today is to look critically at the front-end analog design to ensure that we are moving in the right direction on this very important part of the signal handling.
- Any and all advice and help you can give us will be appreciated!
